Yes

--

### A proven platform for resuscitation

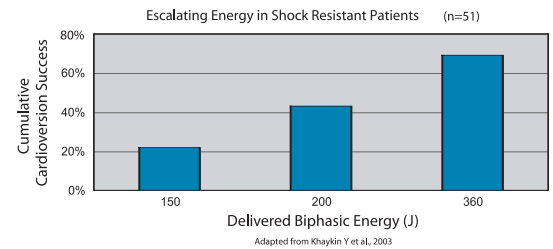

An established record of performance in prehospital resuscitation

Promotes continuity of care throughout the chain of survival:

Outside the hospital 7 of 10 advanced defibrillators are LIFEPAK devices<sup>2</sup>

### When 200 Joules is not enough: only LIFEPAK defibrillators deliver more

In a clinical trial using a LIFEPAK defibrillator in shock-resistant AF, 360J cardioverted 69% of patients versus 43% with 200J<sup>3</sup>

### Built rugged for EMS/fire services

Certified for aeromedical applications (includes device and battery support system)

Yes

No<sup>4</sup>

### Fanless design

Designed without cooling fans to reduce maintenance

Yes

No<sup>4</sup>

### Ease of use

The LIFEPAK 12 defibrillator incorporates features that provide instant and easy view of important data, including the following:

- Trending of vital signs
- ST segment trending
- Paper size 100mm

Yes
